Black Metal Keyguard for Accuratus 260 Keyboards

Order Code: KYBKG-AC260

Accuratus 260 Keyboard - Black Metal Keyguard for Accuratus 260 Keyboards

About

A keyguard is a plate which fits over a keyboard and the holes are positioned directly over the keys. The user can rest their hand on the keyguard and make a single key press. Our keyguards are manufactured in powder coated steel with a wipe-clean surface. The keyguard clips directly onto the keyboard but can be easily removed if necessary. Although we can sell you a keyguard on its own, each one is designed for a specific keyboard or range and is unlikely to fit other keyboards.

This is our Accuratus 260 keyguard which has been specifically designed for the Accuratus 260 keyboard. The keyboard is both stylish and durable with positive feedback keys. It has full height, shaped keys on a contoured inclined base, which together provides hours of comfortable typing. The keyguard has been designed to fit most language layouts of the 260 but we advise that you check before ordering.
