About

The Accuratus 540 Rugged keyboard is a fully sealed IP68 washable and waterproof keyboard designed for industrial environments. It is available with optional red LED backlighting with adjustable levels of brightness, perfect for lower light situations or at night. There is also even the added option of a 75mm x 75mm VESA mounting pattern on the rear, enabling the keyboard to be mounted to any VESA arm, bracket or other mount required. The Accuratus 540 rugged keyboard offers new ultra slim keys whilst still offering an excellent tactile and responsive feel. The keyboard can be fully cleaned and wiped over in literally seconds and also has a handy power on/off button, enabling you to turn the keyboard off during cleaning, preventing keys sending messages to the computer.

For hygienic and clean room environments there is also a cleaning reminder, this enables you to set the time span required for cleaning (30min, 1hr, 2hr or 4hr) if required, which aids infection control as the user is prompted to clean this washable keyboard regularly. The 540 has our NANOARMOUR-2 dual layer antibacterial protection impregnated in the silicone and coated on the surface to aid in deactivating germs/build up of bacteria & virus's. This keyboard is completely washable, making it HTM 01-05 compliant and ideal for any medical application and clean room environment.

For complete ease and comfort the keyboard comes with an angled and contoured base to assist when using on the desk or on your lap/hands. The Accuratus 540 rugged is designed for industrial environments which are dusty, dirty and wet such as the automotive industry, boats, warehouses, manufacturing facilities, in vehicles, production and chemical plants, construction sites and garden centres. It would also be ideal for clinical environments which have to meet very high hygienic requirements such as hospitals, dental practices, cosmetic surgeries, doctors, vets, laboratories and in food & pharmaceutical production areas.

Specifications
